

Extron and HP

SCALABLE MEETING SOLUTIONS FOR THE MODERN WORKSPACE

Extron is working with HP to create scalable meeting solutions for modern workspaces. We are integrating room automation, audio, and signal extension capabilities with the HP Elite Slice G2, Microsoft Teams Rooms®, and Zoom Rooms™ solutions. Our collaboration with HP brings Extron audiovisual control capabilities to the HP Elite Slice G2 providing complete AV and conferencing control across the enterprise. With this new solution, a simple tap on the HP Center of Room

Control screen can control call volume for the room as well as send commands that trigger automation events for display control, shades, lighting, and more.

As part of this conferencing, control, and automation ecosystem, occupancy sensors can also be added to automate system power to turn on displays when participants enter a room and turn them off when the room is empty.
