Extron and Logitech

COMPLETE AV CONTROL FOR THE MODERN WORKSPACE

Extron makes it easy to add automation and AV control to Logitech SmartDock and Tap within today's modern workspaces. SmartDock and Tap can be equipped with Extron control systems, audio signal processors, and digital video switching and distribution. Meeting attendees will benefit from a significant expansion of meeting collaboration features and the convenience of AV room control all from a familiar user interface.

In addition to the easy Extron on-screen control interface, meeting rooms can integrate video signal detection and occupancy sensors to automate video switching, lighting, and display presets. Extron and Logitech scalable collaboration solutions are designed for enterprise deployment and can be maintained with Microsoft SCCM, System Center Configuration Manager.

Extron | **logitech**®

Any room with a SmartDock or Tap is equipped to utilize Extron's powerful AV control capabilities, delivering a turn-key collaboration and control solution that's ideal for any presentation application.

▸ Extends the capabilities of Logitech products to fully-customize applications where AV or environmental control is needed

▸ Combines Extron device controls for meeting spaces equipped with Logitech SmartDock or Logitech Tap as the primary interface

▸ Integrate occupancy sensors to automate lighting, display power, shade control, and other devices

▸ Adjust temperature, control display power, communicate with building management systems from a familiar interface
